PERMIT APPLICATION

PLEASE READ BEFORE SIGNING APPLICATION

***ATTENTION APPLICATION- Incomplete applications will not be considered for approval, and will be returned to the property owner upon receipt.**

THE OWNER SHALL PROVIDE:

- A detailed site plan showing all information requested on the sheet provided. A copy of your plat can also be used for your site plan.
- Proof of ownership (i.e., paid property tax receipt or warranty deed)
- Soil Evaluation on all new systems having less than 10 acres

SITE PLAN MUST INCLUDE:

- Lot lines, dimensions and total lot area, or acres.
- North arrow
- Location of proposed dwelling or building (show distance from at least two property lines)
- Location of proposed septic tank and absorption field
- Arrows showing direction of surface drainage
- Location of ponds, lakes, streams, etc. (if applicable)
- Location of proposed and/or existing wells (in use or abandoned)
- Existing utility lines and easements
- Existing or proposed swimming pools
- Any other conditions which may effect the design or performance of the system

SEWER SYSTEM SHALL NOT BE LOCATED WITHIN:

100 Ft. of a private or public well head

50 Ft. of any surface body of water

20 Ft. of property lines

10 Ft. of utilities

Tank shall be located at least 50 Ft. away from well

To All Septic System Installers in Taney County

RE: On-Site Wastewater Construction Permits

Please be advised that beginning as of August 1, 2005, the following requirements must be met prior to an on-site wastewater construction permit being issued:

As required at this time a completed permit application form, soil evaluation report and preliminary sketch shall be provided to staff for review.

The installer/contractor of record as identified on the application form shall identify on the property the specific location of where the on-site system components are to be installed either by means of staking or marking paint. Stakes shall be placed at the site of the evaluation pit or pits identifying their location in reference to the specific area of the on-site system installation.

Once the installation location of the on-site system components has been identified, the installer/contractor shall contact the Sewer District Office to set up a time to meet with the District Inspector to review the site. This will provide an opportunity to not only inspect the installation area but also to check set-back distances and insure that the systems disposal area is planned to be constructed in the area in which the soil evaluation test was conducted.

Once the site review has been completed and all matters have been found to be in order the permit for construction of the on-site system will then be issued.

Prior to or during the course of construction, if changes and/or modifications are necessary and made to the original plan, the District Inspector prior to being implemented shall approve those changes and/or modifications.

If you have any questions or comments regarding this matter, please feel free to call the Sewer District Office at 417-546-7220.

Thank you,

John Soutee, Administrator
Taney County Regional Sewer District

GENERAL INFORMATION

Inspector's Hours are from 8:00 a.m. to 5:00 p.m. Monday through Friday

Inspection list is scheduled each day for the following business day, by the order in which calls are received. Inspections are performed after 10 a.m.

(Please note: Calls for Inspections received on Friday will be scheduled for the following Monday). Inspectors are in the office for questions, and to complete paperwork between the hours of 8:00 to 10:00 a.m.

For inspections call:

417-546-7220

** Please give complete and accurate directions on how to get to the inspection site, and a phone number where you may be reached in case of schedule changes, or if questions are needed in order to send the Sewer District Inspector to your Septic System Site.

** Permits must be visibly posted on construction site so that anyone driving past your site will see that you do have the required permit. The permit needs to be displayed until construction is completed.
